Welcome to Brain Synx! A very unique educational experience that stems from cognitive neuroscience exercises transformed to encompass educational concepts. During each session your child will be challenged with reading, writing, spelling, math, and problem-solving exercises. These exercises teach your child how to focus, prioritize, and problem solve. We will not incorporate additional subject matter into our curriculum unless you are in the appropriate program. All programs (not including Elite, Proficiency, and Nano) require the KBIT and WRAT-4 assessments. This is a one-time cost of \$300.00, during your first month of training. Please look below for our current specials!
